Household environment is considered standard. No special knowledge in working with the chronically disorganized is necessary.			Household environment requires professional organizers or related professionals who have additional knowledge and understanding of chronic disorganization.			The ICD considers Level III to be the pivot point between a household environment that can be assessed as cluttered and a household assessment that may require the deeper considerations of working in a hoarding environment. Professional organizers, related professionals or others who are working with Level III household environments should have significant training in chronic disorganization and have developed a helpful community network of resources, especially mental health professionals.			Household environment requires a coordinated collaborative team of service providers in addition to professional organizers and family. Such providers might include mental health professionals, social workers, financial counselors, pest and animal control officers, crime scene cleaners, licensed contractors and handypersons. Mental health and/or medical and financial issues are frequently involved.			Household environment will require intervention from a wide range of professionals. Professional organizers should not work alone in a Level V environment. A collaborative team of related professionals needs to be assembled to create and implement clearly defined goals and negotiated timetables. Members might include family, mental health professionals, social workers, building manager, zoning, fire, and/or safety agents. The individual with a Level V home might be involved in legal proceedings, such as a conservatorship, guardianship, divorce, custody, eviction or			
Structure and Zoning	 All doors, stairways and windows accessible All plumbing, electrical, HVAC (heating, ventilation and air conditioning) systems fully functional Installed and functional fire and carbon monoxide (CO) detectors Appropriate animal control (behavior and sanitation) Number of animals in compliance with zoning regulations No evidence of non-pet rodents or insects 		 Structure and Zoning One major exit blocked One major appliance or HVAC device not working for longer than one season (regionally appropriate) Some plumbing or electrical systems not fully functional 		Structure and Vonexistent or non-functional fire and carbon monoxide (CO) detectors One part of home exhibits light structural damage (having occurred in preceding six months)		Structure and Zoning	 Excessive outdoor clutter of items normally stored indoors HVAC devices not working for longer than one year Nonexistent or non-functional fire and carbon monoxide (CO) detectors Structural damage to home existing longer than six months Water damaged floors, damaged walls and foundations, broken windows, doors or plumbing 		condemnation proceedings. Formal written agreements among the parties should be in place before proceeding. • Extreme indoor/outdoor clutter; foliage overgrowth; abandoned machinery • Inadequate or nonexistent ventilation; HVAC systems not working • Non-existent or non-functional fire and carbon monoxide (CO) detectors					
Animals and Pests			Animals and	 Nonexistent or non-functional fire and carbon monoxide (CO) detectors Animals: evidence of inappropriate animal control (behavior and sanitation) Visible or odorous pet waste Visible pet fur/hair/feathers 		Animals and Pests	 Animal population exceeds local legal regulations Evidence of inappropriate animal control Inadequate sanitation (fish tank stagnant, reptile aquarium not well maintained, animal odor and waste, bird droppings) Audible evidence of pests; medium level of spider webs in house Light insect infestation (bed bugs, lice, fleas, cockroaches, ants, silverfish, etc.) 		Animals and Pests	 Odor or evidence of sewer backup Animal population exceeds local ordinances Evidence of poor animal sanitation; destructive behavior Excessive spiders and webs Bats, squirrels, rodents in attic or basement (audible and visible) Medium insect infestation (bedbugs, lice, fleas, cockroaches, ants, silverfish, etc.) 		Zoning	 Water damaged floors, walls and foundation; broken windows, doors or plumbing Unreliable electrical, water, and/or sewer septic systems; odor or evidence of sewer backup Irreparable damage to exterior and interior structure Nonexistent or non-functional fire and carbon monoxide (CO) detectors 		
Household Functions	 No excessive clutter All rooms being used for intended purposes All household appliances fully functional Consistent routine housekeeping and maintenance 		Household Functions	 Light to medium evidence of common household Clutter obstructs some functions of key living area Slight congestion of exits, entrances, hallways and Some household appliances not fully functional Inconsistent routine housekeeping and maintenance 	ns I stairs	Household Functions	 Clutter obstructing functions of key living area Clutter exists around exits, entrances, hallways At least one room not being used for intended limited bed access or space Several appliances not fully functional Inappropriate usage of electric appliances and Substandard housekeeping and maintenance One or two obvious hazardous materials in small 	s and stairs purpose, e.g., items stored in shower; extension cords	Household Functions	 Diminished use of and accessibility to key liven to several rooms cluttered to extent they cannot items stored in shower; limited bed access or Clutter inhibits access to exits, entrances, hale Inappropriate storage of hazardous/combusting paint or chemicals Appliances used inappropriately, e.g., refrigeritems 	ving areas t be used for intended purposes, e.g., r space llways and stairs ble materials, e.g., gasoline, leaking erator being used for storing non-food	Animals and Pests Household Functions	 Pervasive sp Heavy insect Key living sp All rooms no Exits, entran Toilets, sinks 		
Health and Safety	 Safe and maintained sanitation conditions No odors (animal, food or natural gas) Medications: quantity within normal limits; appropriates and child-proof lids as indicated 	oriately stored, current	 Evidence of non-maintained sanitation conditions Odors related to dirty dishes, food preparation surfaces, laundry, toilets; mildew in bathroom or kitchen Medications: quantities questionable; expired, current Rx and OTC commingled haphazard storage; pills not in Rx containers 		faces, laundry, toilets; mildew in	Health and Safety	 Evidence of non-maintained sanitation conditions (food preparation surfaces heavily soiled, dirty dishes, dirty toilets, visible mildew in bathroom or kitchen) Odors obvious and irritating Garbage cans not in use, full or overflowing Presence of accumulated dust, dirt and debris Dirty laundry scattered throughout the house Medications: Rx and OTC easily accessible to people and pets; presence of expired 		Health and Safety	 Improper use of electric space heaters, fans or extension cords Rotting food, organic contamination Expired, leaking or buckling cans and/or jars Dishes and utensils unusable No linens on beds; sleeping on mattress, chair or floor; infestation of bedding and/or furniture Mold and/or mildew obvious; visible moisture or standing water Medications: Rx and OTC easily accessible to people and pets; presence of expired 		Health and	 Appliances unusable Hazardous and primitive use of kerosene, lanterns, candles, fireplace/woodstove as primary source of heat and/or light Human urine and excrement present Rotting food; organic contamination; expired, leaking or buckled cans and/or jars Dishes and utensils buried or nonexistent Beds inaccessible or unusable due to clutter or infestation
